Detailed Action

Allowance

1. The following is an examiner's statement of reasons for allowance:

In reference to claims 1, 12, 15 and 19: *Barringer* (American Petroleum Institute, 'Life Cycle Cost & Reliability for Process Equipment) teaches a method of characterizing a system (see *Barringer*, page 2, paragraph 2). The method includes:

- Logging an outage of a system (see *Barringer*, Table 1: Raw Data from Operating logs);
- Measuring an index associated with each outage, where the index is selected from business impact of the outage (see *Barringer*, page 2, effectiveness or Figure of Merit equation, consists of availability, reliability and maintainability factors); and
- Calculating a Figure of Merit (FOM) based on the contributions of each outage weighted (values fall between 0 and 1, see page 2, last paragraph) in accordance with the associated indicia (see *Barringer*, page 2, abstract or paragraph 1, and pages 4-7).

Further, *Barringer* teaches that certain event data, such as availability are measured directly because availability reflects how often the system is alive and well (see *Barringer*, page 7, paragraph 2, under availability).

However, Barringer does not teach computing the Figure of Merit (FOM) by adding contributions of each outage, the outage being weighted in accordance with one of plurality of relative weight values selected based on the associated additional indicia, and wherein each of the relative weight values corresponds to a range of values of the associated additional indicia and wherein each of the relative weighted values differs from other ones of the relative weighted values.

The claimed invention includes all the features noted above and further provides a means to combine the calculated index contributions to generate a figure of merit (FOM) value for a given sample.

The remaining claims are dependent upon claims 1, 12, 15 and 19 and contain further limitations.

Claims 19-23 are newly added claims and they do not introduce new matters.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
